# PREFACE

The Central Board of Secondary Education has brought about a change in the biology syllabus for classes XI and XII, to cope with the tremendous development in the fields of biotechnology, genetic engineering, biomedical technology, etc., in the recent times.

Hence there is a need to bring out this new edition of *Together with<sup>®</sup> Biology*, for Class XII.

The prime aim of this book is to provide adequate practice to the students to prepare for the Board Examination. It provides a complete and comprehensive account of the concepts that have been prescribed in the syllabus.

The questions that have occurred in the previous years' board examination have been covered completely upto the latest examination; they have been organised chapter-wise.

Every chapter is also provided with all the questions from the NCERT textbook and several additional questions, that have been framed to cover the entire content of the lesson. The one mark questions are such that they not only help in achieving a thorough grasp of the subject for the board examination, but also in the preparation for competitive examinations.

The answers to these questions have been prepared on the same lines as the marking scheme provided to the examiners for the evaluation of board exam answer-scripts and hence the students have been guided in the most appropriate way for their board examination.

Appendix of HOTS questions has been added to provide the difficulty level of questions which cover 20% weightage of total marks in Board Paper.

It has been a pleasure working with the staff of *Rachna Sagar Pvt. Ltd.*, who have shown their usual care, concern and enthusiasm in bringing out this book of quality; my sincere thanks to all of them.

I wish the students make the best use of this book and be benefitted to the maximum, in terms of marks and knowledge.

All constructive criticism and suggestions for the improvement of this book are always welcome.
